

Overview of ASTPP

A Smart TelePhony Platform for Individual Business, Wholesale and Residential VoIP Service Providers! It is available as an open source solution. It means without any investment, one can start his telephony business using ASTPP.

ASTPP, being one of the most powerful VoIP Billing Software, thrives to benefit its users by providing a comprehensive telephony solution. This open source solution has lifted itself up from a mere VoIP billing solution to "**A Smart TelePhony Platform**".

The latest version of ASTPP is provisioned with some advanced functional modules which are designed to eliminate the need of multiple solutions to run a VoIP business. It has integrated **hosted IP PBX, Class 4/5 Softswitch, and complete invoicing and billing solution developed by leveraging Smart Technology**.

Being A Smart TelePhony Platform, it can be used as a complete driving force for your VoIP business. At the same time, businesses can still use its comprehensive FreeSWITCH Billing solution as an integral part of their existing FreeSWITCH solutions.

Its striking and responsive user interface, finely segmented features in different access panels (Super Admin, Admin, Reseller, User) and remote access features make it simple to use and access to assure your business is well managed and easily reachable at all the time.
